TITLE : AQUEOUS CURABLE RESIN COMPOSITION

ABSTRACT : PROBLEM TO BE SOLVED: To provide an aqueous curable resin composition having excellent storage stability as a coating and excellent performances such as weather resistance without causing problems of environmental pollution.

SOLUTION: The aqueous curable resin composition comprises a resin (A) having  $\geq 5$ -membered ring cyclic carbonate groups per molecule of the resin and a compound (B) having an amino group. The amino group-containing compound is composed of an amino compound selected from the group consisting of amino acids and amino acid derivatives.
